Time and Roaring Kitty -The Connections

Core thesis
Our community strongly believes Time Roaming Cat is directly connected to Roaring Kitty. Why? Read Below

01 Who Is Time?

The source of the signal

Based on everything we've seen, **we believe that Time is directly connected with Roaring Kitty**. Some in our community literally believe it's Keith – others believe Time is someone on Keith's team. Some believe Time is Greg, or the BP dev, or even FBB4. The evidence you'll read in this document might just bring you to the same conclusion..

Time first entered the Tsuki community in late 2024 as Time Traveler, quickly gaining attention for unusually sharp interpretations of Roaring Kitty memes, emojis, timestamps, and community lore. He became known as a wizard.

In December, he created a coin, **front-ran Roaring Kitty 3 times**, and **roundtripped 1.8M dollars**. After a long period of sporadic activity, mirroring the long absence of RK, Time returned to X, begun Phase 2, dropped 2 utility tokens, and told his Telegram about the return of Roaring Kitty the day before it happened.

02 The Front-Runs

The strongest reason people are paying attention

Time was already a legend in the Tsuki community when he created his X account on December 1, 2024. He then did something incomprehensible. On December 4th and 5th, he made a series of tweets at 1:09 and 4:20. Then on the morning of December 5th, he posted two emojis from the RK timeline. Hours later, Roaring Kitty came back from his long absence with his Time tweet. In that tweet, he used the word TIME, and he had the numbers 1:09-4:20.

The odds of Time guessing that Roaring Kitty would make the tweet with the words TIME and the numbers 1:09/4:20 are astronomical. **How Did He Do It???**

Time wasn't done. He also made THREE posts at 8:00 – which preceded 2 Roaring Kitty posts…at 8:00. **How did he know?**

Date	Signal	Why it matters
Dec. 1, 2024	@TimeRoamingCat appears	The Time identity enters the ecosystem.
Dec 4-5, 2024	Time creates 3 posts with timestamps of 1:09/4:20	These two numbers were on RK's Time tweet.
Dec. 5, 2024	TokenTIME launches	First on-chain expression of the Time narrative.
Dec. 5	Roaring Kitty posts TIME image	TIME, 1:09, and 4:20 all visible in the image.
Dec & Jan	Time makes 3 posts at 8:00	These posts had very specific themes
Dec & Jan	Roaring Kitty follows Time's posts with 2 8:00 posts	**How could Time have known the 8:00???**

03 Roaring Kitty Front Ran Time?

Roaring Kitty foretold the Emergence of Time!

The Roaring Kitty memes of 2024 have been a source of endless speculation. They tell multiple stories, they pumped stock markets, and are still hotly debated today. But our research shows a clear storyline – One that clearly shows that Time was part of a much bigger plan.

For a full breakdown of the meme timeline, along with links, please see this tweet:

Meme	Meaning
Fight Club	This meme discusses multiple personas – DFV & RK. Introduces the concept that some personas can do things others cannot.
Breaking Bad	The "Crypto?" meme – proof that RK was getting into Crypto
Emoji Timeline	Time is an emoji master. His earliest Tsuki impact was explaining the RK timeline.
Pressure and TIME	First mention of Time. The Shawshank meme emphasizes escape and the concept of "Pressure & Time"
Pay Attention – Give me a Sign – One More Time…	After telling us to pay close attention to his words, RK drops a Britney Video with the sign: "Time"
Bourne Identity	Roaring Kitty runs from police, and takes on a new identity
Nom de plume	This Aladdin meme explicitly points to Time staying ahead of his opposers by taking on a nom de plume (new persona)
8-Ball livestream	In his YT livestream, at exactly 1:09, Keith Gill says the plan "Might be Time"

04 TokenTIME - $TT

The Ultimate lore coin & the Great Roundtrip

TokenTIME launched on **December 5, 2024** – hours before RK's TIME post. Time held roughly **50%** of supply, watched the value of his position rise dramatically, and **did not sell. He also did not aggressively market** the strongest timestamp connections later discovered by the community. He built a coin, watched the value go to 1.8M, watched as Tsuki supporters sold-off his coin, and sat back for 1.5 years to let Time do it's work.

If Time is the newest persona of Roaring Kitty, would it not makes sense to purchase the ultimate lore coin? What other Dev is this connected to Roaring Kitty? What other dev owns 50% of the supply, gave up the 1.8M dollars, roundtripped it as it fell to less than 30k, THEN started building the community?

The CA is below – The coin is the perfect lore coin. If Time is one day revealed as RK, what will happen to the price of a coin that already has unmatched supply control?

05 Phase 2 - TTT & Alpha Terminal

The ecosystem expands

After a quiet 2025, Time returned on Christmas and dropped TTT, one year to the day after Roaring Kitty posted a Christmas gift on December 25th. This was the beginning of **Phase 2**. An X community was soon created, and Time began getting active again.

Then in April of 2026, **Alpha Terminal** followed: this wasn't just a token, but a restricted-access website with tools, gates, and mystery mechanics.

We are actively trying to uncover the secrets of these two utility tokens. Time has promised something special will happen when we hit 100 nodes (users). Imagine Roaring Kitty has created a new way to distribute information to his select followers – That's Alpha Terminal, and that's why we're so excited about it.

The big question
Is Alpha Terminal a game, a puzzle, a Dex, an encrypted communication platform, an alpha distribution system - or something the community has not fully understood yet? Help us figure it out!
